---

## Summary

A junior Software Engineer with a solid background in web technologies including HTML, CSS, JavaScript, and React, along with strong foundations in problem-solving, C++, Python, data structures, and object-oriented programming (OOP). Passionate about learning and contributing to innovative software and web development projects.

---

## Internships

### Internat ITI

Skills Gained :Experience with group projects and user interface development

### Intern - Inovext Ltd

Completed a 2-month internship focusing on front-end development.

### UI/UX Basics Course

Learned design principles and user experience fundamentalsdevelopment practices.

### Front-End Web Development Course

Learned HTML, CSS, and JavaScript fundamentals.

### JavaScript Basics Certification

Covered core concepts such as variables, functions, and DOM manipulation.

### React Fundamentals Course

Built reusable components and learned modern front-end

---

## Education

- Facultyofcomputer and information Zagazig university
- 2023-2026
- GPA : 3.81

---

## Relevant Skills

### Technical Skills

- Proficiency in Javascript, Python, C++,HTML
- Data Structures, Algorithms and Operating systems
- Development Methodology
- Problem Solving : Competitive Programming experience
- Database and SQL
- Adaptability and continuous learning
- UI/UX : good experience with user interface design

### Soft Skills

- Communication , Teamwork ,Time management
- Tools: Git, Visual Studio Code

### Languages:

- English (Good), Arabic (Native)

---

## Extracurricular Activities

- IEEE ZU Member
- Participated in DevFest Cairo 2024
- Member in ICPC ZU community

---

## Projects

### Furniture E-Commerce Website

- A responsive web app for furniture shopping built using React. Features include product display, shopping cart, and user authentication.
- Technologies: React, CSS,HTML
- Live demo : <https://lnkd.in/da3NN6PJ>
- repo : <https://lnkd.in/ddVeS8nW>

### Notes (Website)

- A simple and responsive notes-taking web application built with vanilla HTML, CSS, and JavaScript. The app allows users to:
  - Add, view, and delete notes with timestamps.
  - Mark important notes using a star icon.
  - Store and retrieve notes using Local Storage for persistence.
  - Features a responsive design for mobile and desktop devices.
- live demo : [https://norhanelyann.github.io/Notes\\_App/](https://norhanelyann.github.io/Notes_App/)
- repo: [https://github.com/NorhanElyann/Notes\\_App](https://github.com/NorhanElyann/Notes_App)
